EXPERIENCE

Aug 2024 – Aug 2025   **Web Application Developer Intern, Boon Software**   Jakarta

- Designed and optimized API integrations between WMS and e-commerce platforms using Oracle Integration Cloud, increasing system effectiveness by 40%.
- Developed reporting workflows in Oracle APEX, improving productivity and reporting efficiency by 20%.
- Implemented automation and bug fixes in Odoo ERP, resulting in a 40% improvement in operational efficiency.
- Assisted partners in technical report development, enhancing reporting performance by 60%.

Feb 2024 – Jun 2024   **Cloud Computing Cohort, Google, Tokopedia and Bangkit Academy**   Bandung

- Built a "NusaMap", an application helping travelers locate nearby gas stations and rest stops within a 5km radius.
- Deployed end-to-end capstone projects on Google Cloud Platform, achieving 30–40% better scalability compared to local environments.
- Optimized cloud resource allocation using Compute Engine and Cloud Run, reducing deployment costs by 20%.

PROJECTS

Dec 2025 – Jan 2025   **Portfolio | Technologies : HTML, CSS, Javascript, Vue.js, TailwindCSS**
GitHub | Live Demo
- Developed responsive personal portfolio using Vue.js and TailwindCSS with component-based architecture.
- Implemented smooth animations and mobile-first design, achieving 95+ Lighthouse performance score.
- Deployed on Vercel with automated CI/CD pipeline.

Dec 2025   **Weather CLI App | Technologies: Rust, Open Weather API, API Integration**
GitHub
- Built command-line weather application in Rust integrating OpenWeather API with real-time data fetching.
- Implemented error handling, JSON parsing, and user-friendly terminal interface.
- Learned Rust's ownership model and async programming while working with external APIs.

Nov 2025 – Dec 2025   **Calculator Divider Income | Technologies: Rust, Slint UI**
GitHub
- Created desktop GUI application using Rust and Slint UI framework for expense splitting calculations.
- Designed intuitive interface for splitting expenses with customizable percentage allocations.
- Applied Rust's type safety to ensure accurate financial calculations with zero runtime errors.

Jul 2025 – Aug 2025   **Birthday Gift v2 | Technologies: HTML, CSS, Javascript**
Live Demo
- Designed and developed interactive web experience with custom animations and responsive design.
- Refactored and rebuilt from original version, improving code structure and user experience.
- Implemented vanilla JavaScript for dynamic content and smooth transitions without framework dependencies.

EDUCATION

Sep 2021 – Present
Bachelor of Informatics, Telkom University | GPA: 3.72/4.00   Bandung
Relevant Coursework: Programming, Logic Programming, Data Structures & Algorithms, Operation System, Data Science, Natural Language Processing.

SKILLS

Languages: Python, JavaScript, Java, C#, Rust
Frontend: Vue.js, HTML/CSS, Responsive Design
Backend: Django, Spring Boot, REST APIs
Cloud & DevOps: Google Cloud Platform (Compute Engine, Cloud Run, Cloud Storage), Firebase
Enterprise Tools: Oracle APEX, Oracle Integration Cloud (OIC), Odoo ERP
Database: PostgreSQL, MySQL
Tools & Methods: Git, API Integration, Workflow Automation, CI/CD

LEADERSHIP & ACTIVITIES

Dec 2023 – Apr 2024
Member | Google Developer Student Clubs, Telkom University   Bandung

- Participated in technical workshops focused on Cloud, Machine Learning, and Mobile Development.
- Participated in hackathon as a "Hacker", creating web apps.
